Developing a Graduate Level Introductory Food Systems Course

Ivory Loh  MPH Student, Dietetic Intern  PhD, MSPH, RDN  Preceptor: Marie Spiker,

BACKGROUND

The UW Master of Public Health (MPH) Common Core Curriculum was recently revised, which led to changes in course requirements for MPH and MS graduate students in the Nutritional Sciences Program for the upcoming 2020-2021 academic year. This created a new need for an introductory food systems course that fulfilled Council on Education for Public Health (CEPH) competencies, which would be offered to MS graduate students in the UW Master of Public Health (MPH) Common Core Curriculum was recently revised, which led to changes in course requirements for MPH and MS graduate students in the Nutritional Sciences Program for the upcoming 2020-2021 academic year. This created a new need for an introductory food systems course that fulfilled Council on Education for Public Health (CEPH) competencies, which would be offered to MS graduate students in the UW Master of Public Health (MPH) Common Core Curriculum was recently revised, which led to changes in course requirements for MPH and MS graduate students in the Nutritional Sciences Program for the upcoming 2020-2021 academic year.
